

# **CONTENT**

## **Chapter 1.**

### **Energy Resources**

- P 1.1 Introduction
- P 1.2 Definitions
- P 1.3 Transformation of Energy
- P 1.4 Classification of Energy Sources
- P 1.5 Population and Human Development
- P 1.6 Energy Production
- P 1.7 Classification of Fuels

## **Chapter 2.**

### **Energy Reserves**

- P 2.1 Introduction
- P 2.2 Classification & Estimation of Petroleum Reserves
- P 2.3 Exploration For Petroleum In Sedimentary Basins Of India And Results Obtained
  - 2.3.1 Sedimentary Basins Of India And Exploration Results
  - 2.3.2 Upper Assam Shelf (Including Upper Assam Valley, Nagaland & Meghalaya)
  - 2.3.3 Tripura-Cachar Fold Belt
  - 2.3.4 Cambay Basin
  - 2.3.5 Bombay Offshore Basin
  - 2.3.6 Krishna-Godavari Basin
  - 2.3.7 Cauvery Basin
  - 2.3.8 Andaman-Nicobar Basin
  - 2.3.9 Bengal Basin
  - 2.3.10 Himalayan Foothills

- 2.3.11 Ganga Valley
- ⊃ 2.4 Non-Conventional Hydrocarbon Resources:
  - Coal – Bed Methane & Gas Hydrates
  - 2.4.1 Gas Hydrates
- ⊃ 2.5 Exploration for Coal in India
  - 2.5.1 Coal Industry in India
  - 2.5.2 Coal reserves
  - 2.5.3 Coal: Choice for Indian Energy
- ⊃ 2.6 Renewable Energy Potential

### **Chapter 3.**

#### **Energy Economics**

- ⊃ 3.1 Introduction
- ⊃ 3.2 Energy and Economic Linkage
- ⊃ 3.3 Global Energy Scenario
- ⊃ 3.4 Indian Energy Policy
  - 3.4.1 Short Term Strategy
  - 3.4.2 Medium Term Strategy
  - 3.4.3 Long Term Strategy
- ⊃ 3.5 Blue Print for Power Sector In India

### **Chapter 4.**

#### **Energy and Environment**

- ⊃ 4.1 Introduction
- ⊃ 4.2 Energy & Climate
- ⊃ 4.3 Stabilizing Earth's Climate
- ⊃ 4.4 Present Emission
- ⊃ 4.5 Cost Benefit of Emission Control

### **Chapter 5.**

#### **Conversion of Energy Form**

- ⊃ 5.1 Introduction
- ⊃ 5.2 Solar Energy
  - 5.2.1 Introduction
  - 5.2.2 Direct Conversion Of Solar Energy Into Electricity
  - 5.2.3 Materials Used
  - 5.2.4 Principle Of Working
  - 5.2.5 Application
  - 5.2.6 Further Scope
  - 5.2.7 Earth Satellite Solar Power System (SSPS)

- 5.2.8 Present Status
- 5.2.9 Operational Stand Alone Solar Power Plant
- ⌘ 5.3 Wind Energy Conversion
  - 5.3.1 Wind Energy Resources
  - 5.3.2 Available Power in the Wind
  - 5.3.3 Site Selection
  - 5.3.4 Factors for Consideration
  - 5.3.5 Analysis of Wind Regimes
  - 5.3.6 Frequency Distribution
  - 5.3.7 Wind Turbine Rolor Classification
  - 5.3.8 Design of A Rotor
- ⌘ 5.4 Hydro Power Generation
  - 5.4.1 Hydro Turbine
  - 5.4.2 Governing System Mini-Micro & MISC.
- ⌘ 5.5 Energy Conversion from Mini/Micro Hydel Stations
  - 5.5.1 Small Hydel Development
  - 5.5.2 Nature of Small Hydel Development
  - 5.5.3 Turbine for Small Hydro Electric Power
  - 5.5.4 Advantages And Limitations Of Small Scale Hydro- Electric
- ⌘ 5.6 Wave Power
  - 5.6.1 Technology Description
  - 5.6.2 Utility Applications
- ⌘ 5.7 Biomass Energy
  - 5.7.1 Biomass Sources
  - 5.7.2 Operational 10 MW Biomass Based Power Plant
- ⌘ 5.8 Bio-Gass Energy
  - 5.8.1 Biogas Technology
  - 5.8.2 Applications
- ⌘ 5.9 Hydrogen Generation
  - 5.9.1 Solar Energy Conversion to Hydrogen

## **Chapter 6.**

### **Wastages of Energy**

- ⌘ 6.1 Introduction
- ⌘ 6.2 Efficiency
- ⌘ 6.3 Transportation of Energy Resources and Wastages
  - 6.3.1 Generation Losses
  - 6.3.2 Transmission and Distribution Losses

6.3.3 Utilization Losses

## **Chapter 7.**

### **Conservation of Energy**

- P 7.1 Introduction
- P 7.2 Need for Energy Conservation
- P 7.3 Conservation Technique
- P 7.4 Conservation in Electric Supply Company
- P 7.5 Energy Audit
  - 7.5.1 Need for Energy Audit
  - 7.5.2 Energy Intensity
- P 7.6 Energy Conservation Practices

### **CASE STUDY FOR INCOMPLETELY**

**CONCEIVED PROJECT**

### **INDEX**
